New Rochelle was the first. It's only a matter of time before more containment areas are created, and troops roll in to a neighborhood near you.
>States currently under emergency (16)
>Colorado
>North Carolina
>Massachusetts
>Michigan
>New Jersey
>Florida
>New York

>Ohio
>Rhode Island
>Maryland
>Washington State
>California
>Oregon
>Utah
>Kentucky
>Connecticut
>Georgia

These states now have the ability to deploy the national guard not only for humanitarian aid, but to forcibly contain areas and movement.

Look bud, this is honestly a nothingburger flu being drummed up by fake news videos on wechat/twitter and lonely happeningfag neets. You'd have to be a retard to not spot that.

Let's look at this objectively without emotionally manipulated manchildren screeching about muh 10%+ death rates, muh bioweapon leak, muh elite depopulation conspiracy, muh ccp shill coverup, muh so2 from burning bodies and otherwise retarded shill narratives.

>b-but muh mass quarantines in Italy and China!1!1! It's the beginning of exponential growth that there is no evidence for being possible to begin with!1!1!1!
>b-b-but muh 28 day incubation period, just wait 4 more weeks™ and we're all gonna be coughing up blood!1!1!1!1!

It's killed only 4300 people after several months. SARS, MERSA, MERS, H1N1 etc etc were more deadly and viral. The common cold literally kills more people every year than this "pandemic."

China has it under control. Italy has it under control as does every other government around the world. By April, this coronavirus outbreak will be nothing more than a meme, and the world economy will keep going as usual.

Happening canceled

I'm more concerned over how they should have military around the border by now, because according to some news sources in Asia, rafugees are running all over the place like roaches trying to run away from the virus. Plus, when/if shit hits the fan in Germany for example, people will inevitably try to flee to places with less cases, or pass us in the process of doing so. Border needs to be reinforced.

This is retarded. 1/5 of the species more or less is under some type of restriction/quarantine. Medical systems are being overwhelmed, one after another. Thousands dead. Ungodly financial consequences for governments, investors, and soon, the sick. Authoritarianism is suddenly perceived as a good thing. Social distancing is now a thing. This is economically, politically, socially, and medically an historic watershed event we are experiencing.

How the fuck America going to quarantine their niggers? I'm not talking about the normal blacks who are ok. I'm talking about the hood rats and thug gangsters. Those ones will just go crazy and spread the wu all through the hood... now you've got zombie niggers smashing into your house looking for cough medicine

You are correct. As this spreads it will (or already has) hit the ghettos in the U.S. We are already aware of how well nogs maintain their hygiene and environment. They will flood every government agency demanding all the gibs because racism. And if they can't get it there, they will look for it in your house.
